UNI-LINE

Carbide Rods for Precision Tools

UNI-LINE - PROGRAM FOR PRECISION TOOL MANUFACTURERS

PCG GmbH offers a special compact range for solid carbide round bars.

It includes essential standard dimensions for round bars L = 330 mm und fixed length with diameter „h6“ ground.

The grade of carbide used with the label UL10 is suitable for manufacturing of milling and drilling tools for universal applications.

The UNI-LINE program is limited to frequently used dimensions.

The program is characterized exceptionally through a very good price-performance ratio.

UL10 - CARBIDE GRADE FOR MULTIPLE APPLICATION

UL10 is a carbide grade with 10% Co binder and typical submicron structure.

This grade is characterized by a balanced ratio between medium hardness and good toughness.

It is suitable for machining of a large selection of materials especially in the ISO scopes of application P20-30, M20-30 and K20-30.

UL10 - GRADE SPECIFICATION

Grade	Co-Content ± 0,5 %	Density ± 0,10 g/cm ³	Hardness HV30 ±50	Hardness HRA ±0,3	TRS ±200 N/mm ²	Fracture toughness ±0,3 K _{Ic}
UL10	10,0	14,40	1600	92,1	3900	10,7
